

Statement of Commitment

Mayflower Canada is committed to a three level environmental campaign to Reduce, Reuse and Recycle. Mayflower Canada is committed to the following initiatives:

Personal: Our in house GO GREEN environmental initiatives encourage Members to adopt:

- programs such as reuse and recycle packing material
- blanket wrap services, reducing packaging and materials
- reduced fuel emissions including anti-idling regulations, reduced highway speed, regular mechanical and safety inspections on all equipment
- in-office recycling programs, less printed information, electricity conservation
- the reuse of pallets and crates
- efficient dispatching of equipment

Consumer: The Mayflower GO GREEN program encourages our moving consultants to introduce and encourage our customers to GO GREEN by:

- providing our clients with a "Living Lighter" action plan and challenge
- providing our clients with tips, suggestions, and internet links to facilitate Going Green in their new location
- providing our clients with local solutions for the sale and reuse, or environmentally friendly disposal of house hold items not being moved
- provide our clients with environmental house warming gifts to further encourage a GO GREEN lifestyle

Community: The Mayflower GO GREEN program encourages our members to become involved in local community initiatives by joining the GO GREEN TEAM through volunteering and participation of management and staff in environmentally focused community events such as:

- the use of trucks and equipment for local environmentally focused projects
- participation in, or initiation of, community projects such as tree planting, park cleaning, flower planting, recycling, etc.
- the donation of used boxes, pallets, and/or containers for environmental projects

We all know the importance of reducing our footprint, why not make this move the first step in that direction?

Future generations will thank us.....
